FUTURE TEACHER? BE CLASSROOM-READY!

The networked teacher – teaching in the 21st century is an online course for student teachers starting 25 February 2019

A short practical course for future teachers, to accompany your training – certificated, online, free.

- Learn about active learning, innovative uses of ICT and collaborative teaching and learning;
- See videos of inspiring teaching and access a range of support material;
- Use online tools and social media to communicate and engage in peer review activities;
- Hear from experts and peers, and pick up easy to adopt practical suggestions;
- Build a personal learning network of future teachers like you for mutual support;
- Make your first teaching post application stand out.

What will you learn about?

Entering the job: how teaching is changing, expectations, reaching out, social media for lifelong learning, your pedagogical digital competence.

Unlocking the classroom – active technology: using technology in the active, collaborative, personalised and inclusive classroom.

Unlocking the classroom – active space: classrooms without walls, collaborating digitally – and safely.

The second staffroom: building your personal learning network with other teachers for professional support and development, curating resources, sharing and re-using digital materials.

"The course allows us to get acquainted with many tools and applications, and learn how to use social media in education."

"There is a sense that you are not alone and that there are opportunities to collaborate with fellow learners."

Student teachers, March 2018
